RESUME
CJ/Socias

About us

Coldly calculated environments

CJ/Socias is a leading company in providing integrated solutions for air conditioning systems to the most diverse architectural typologies – residential, commercial and/or industrial.

Our extensive experience makes us a market reference in the design and installation of efficient air conditioning systems focused on zoned operation and energy saving. Our priority is to deliver system solutions in which the concepts of efficiency, comfort and indoor air quality prevail in order to optimize our customers' investment, preserve the health of occupants and respect the environment.

Our innovative and pioneering spirit leads us to renew our offer to remain competitive, offer a high standard of service and ensure our customers enjoy comfortable and sustainable living environments whether at the workplace or at home.

More than 25 years of dedicated service

CJ/Socias began operations in 1987 under the name of Socias & Asociados, a construction company for real estate development within the tourism sector. It is in 1992 when the company expands its service platform incorporating a new line of business: the design and installation of air conditioning systems.

In 1996 our company name changes to C J Socias & Asociados, SRL. Our fundamental purpose: the installation and maintenance of air conditioning systems for industrial, commercial and residential sectors. Soon after we start representing major world-leading air conditioning manufacturers in Dominican Republic.

Today we have an experienced and highly qualified team of more than 30 professionals including architects, engineers, and technical and financial professionals distributed among five departments Design, Projects, Maintenance, Controls and Finance.

Regardless of the scale and scope of the project CJ/Socias offers climate control solutions for ultimate comfort and energy efficiency suitable for each of our customer's needs: Residential, Commercial, Industrial and Hospitality – in both health and tourism sectors.
